

To Whom It May Concern:

I am writing this letter to express my disappointment that the FCC is trying to mandate what type of content that XM can provide to its subscribers. We pay a fee for this service and should be able to determine what we receive in return. The millions of people who have subscribed to XM did so because XM was providing a much better product than local radio. If they would like to compete, they need to improve their product rather than attempt through political means to cutback the product XM is providing. It should be obvious to the FCC that if millions of people are willing to pay for satellite radio when they can get local radio free, that XM is doing something right. I respectfully urge the FCC to reject the NAB's petition 04-160 and support the kind of programming that I demand and deserve.

Sincerely,

J. Taylor Currie
